Standards Implementation and Testing Environment (SITE)
Developer Provided Testing Services
(Direct Transport Standard)

Developer Registration Instructions

The Office of National Coordinator for Health Information Technology (ONC) Standards Implementation and Testing Environment, Developer Provided Testing Services (http://sitenv.org/direct-vendor-tools) is a platform for providers and implementers to identify and contact registered health IT developers for Direct Transport Standard testing services.

This document describes instructions for health IT developers to complete the registration process on SITE to offer Developer Provided testing services.

1. **Create a Developer account**
   a. Select "Sign Up" from the Developer Registration page
   b. Complete all fields in the "Sign Up" form
   c. Select "Sign Up"
   d. Select "Close" once "Emailed Registered Successfully" notification is displayed

2. **Register a New Direct Service**
   a. Login developer account
   b. Select "Register Your Direct Service" and select "Accept" to accept the participant agreement to proceed
   c. Complete all fields in the "Direct System Registration" form
   d. Click "Register Service " to complete your registration

3. **Upload Trust Anchor *Required***
   a. Locate the entry in the "Registered Direct Services" list
   b. Select the Trust Anchor "attachment icon" on the right of the entry
   c. Select "Select a Certificate" on the Trust Anchors box, browse to file and select open
   d. Once trust anchor has been selected, select "Submit Anchor" and close

4. **Update Developer Information**
   a. Login developer account
   b. Select the icon located at the beginning of the entry that you would like to update
   c. Update the fields in the "Direct System Registration" window and select "Update Service" to complete
